never sit still

Seek

Challenge what feels too familiar.

Work is on the move, with people staying on task wherever they are. As a result, collaborative spaces are playing a more significant role in supporting how work gets done. And with change comes the need to challenge conventional thinking to discover innovative solutions that support the way people work and the way space transforms.

 **Green Fact**
Allsteel's commitment to Design for the Environment and sustainable manufacturing is evident with Seek. In fact, Seek's polymer shells are made from 100% recyclable color-matched polymers. As a result, Seek has earned SCS Indoor Advantage™ Gold Certification and may contribute toward LEED® credits.

Open your mind to the unfamiliar.

Say hello to Seek, a seating solution that is more about creating space than filling it. It's about accommodating movement and adapting to environments on the fly to support impromptu collaboration. And a way of looking at seating as flexible and agile – like your people – to fit wherever need or imagination demands.

Rediscover your space.

Today's footprints are shrinking, and the desire for collaboration is in full demand. The key to success is bringing people and space together in a way that fully utilizes both. Seek's efficient footprint and versatile design support multi-purpose environments by transforming any area into comfortable, adaptable, collaborative space. With Seek, you never have to look far for readily accessible seating.

Nested stacks minimize footprints and free up valuable real estate. Easy maneuverability aids planning and minimizes the work of organizing, storing, and allocating seating.

Seek blends into a variety of environments. Being lightweight and mobile, Seek is ideal for collaborative settings like guest seating, breakout spaces, and areas that serve multiple functions throughout your space.

Space applications increase because Seek can be stored where it's used – in space-saving nested stacks.

Where design and performance intersect.

Lengthy training sessions shouldn't mean hours of discomfort. With Seek, extended periods of sitting are refreshingly comfortable. Designed to move with the body and minimize pressure points, Seek conforms to each user's body movement, so no matter how they sit – or how long they stay – they remain comfortable.

Seek nests neatly and stacks up, not out, freeing valuable space.

Nest height 36"

Nest width 24", depth 37"

Stack height 53"

Stack width 24", depth 22"

Seek can be stored in convenient, space-saving nested stacks. Easily move a stack where you need it, when you need it.

Traditional stacking chairs sacrifice comfort for convenience. Seek's people-focused chair design and innovative features encourage both.

A higher level of comfort.

The idea has always been to provide seating that one can sit in...not on. Seek achieves this with a deceptively simple design that conforms to the shape and movement of each user's body. Its pivoting back allows for natural shifts in posture while intuitively distributing lumbar support. The contoured seat reduces pressure points and evenly distributes weight for long-term comfort. So sit back, relax, and let Seek do all the work.

 **Green Fact**
Green-E certified wind renewable energy certificates offset 100% of the energy used to assemble Seek chairs.

Seek's pivot-back technology intuitively provides balance and lumbar support for ergonomic recline.

The contoured seat design distributes weight evenly, stabilizing the sit bones for forward and reclined comfort.

Seek comfortably accommodates 95% of users.

The luxury of choice.

Freedom in any decision starts with selection. Seek defines freedom with a versatile statement of line, easy-to-clean polypropylene, replaceable upholstery, optional mesh back, and unmatched comfort and style. Finally, one decision you don't have to worry about.

Seek's polypropylene backrest and arms can be wiped down with ease.

Lightweight, mobile, and ready to move with casters or glides.

Optional mesh back lets air flow through for added comfort.

With optional seat cushion in performance fabric, vinyl, and leather, Seek becomes even more versatile, and supports a higher level of customization.

Eight contemporary colors pair with black and silver frame finishes along with mesh back options to blend seamlessly into your environment.
